TopAccess roof access hatches

Roof access of the highest level

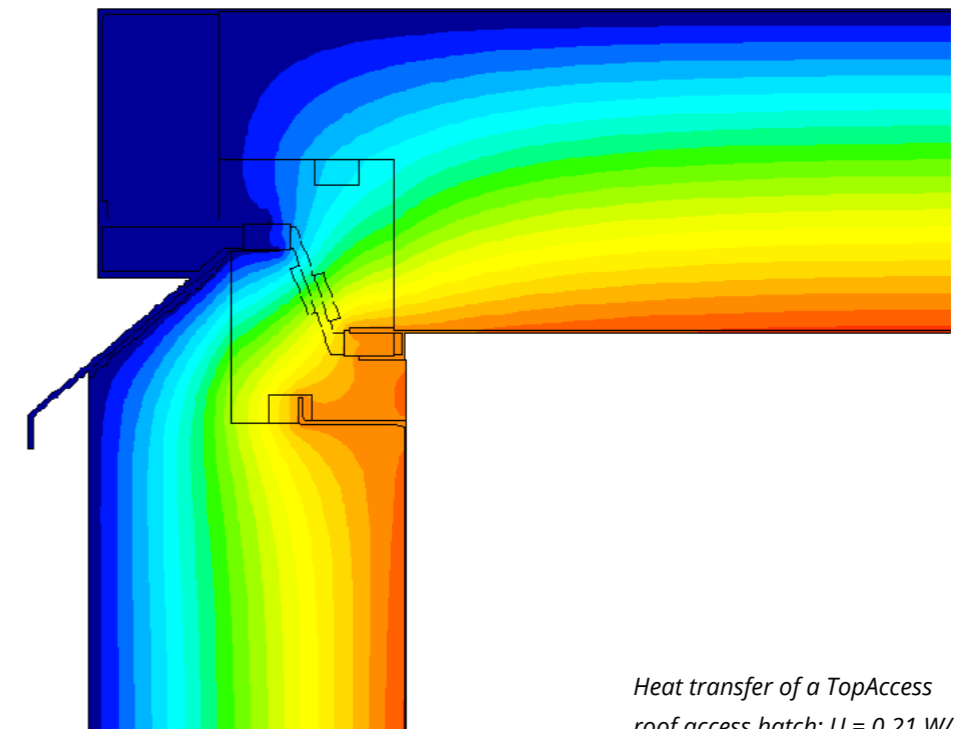

Sustainable roof access

Roof access of the highest level

The new roof access hatches from Staka do credit to their name TopAccess, providing roof access of the highest level. TopAccess roof access hatches are the best solution for construction work where energy conservation has the highest priority. Heat loss through roof openings is reduced to a minimum, thanks to the use of extremely high quality materials with an exceptional insulation value of $U = 0.21 \text{ W/m}^2\text{K}$.

Quality

Staka roof access hatches and roof access equipment come with a ten year guarantee as standard. To guarantee the quality of our products, our roof access hatches are KOMO assessment tested and certified.

Heat transfer of a TopAccess roof access hatch: $U = 0.21 \text{ W/m}^2\text{K}$

“Save energy with a TopAccess roof access hatch”

“A roof access hatch from Staka is the best guarantee for safe roof access”

Ted Ham, commercial director at ZND Nedicom

Safe access to your roof

Sophisticated solutions for any flat roof

Staka helps you to access your roof safely. In office buildings and industrial units you will need a roof access hatch for practicality; from roof inspections to using roof top equipment. For jobs like these, you need quick and safe access that works for you.

Stairs and ladders to the roof

If you also need stairs or a ladder to access the roof, Staka supplies both, fully tailored to our roof access hatches. A retractable ladder can be neatly stowed away in the housing of the roof access hatch and an extension ladder offers a practical and cost effective solution. For higher ceilings, it is better to opt for the safety of a caged ladder. For frequent use, a fixed staircase is ideal.

"The roof access hatch is a high quality product that is just so easy to install"

Mr Hüwel, engineer at Goldbeck West

Convenient installation

Save time with a Staka roof access hatch

Staka roof access hatches are delivered to your construction site completely assembled with installation slots for installation on the roof. The roof access hatch and steps or ladder are fully tailored to each other. Installation is quick and painless. All Staka roof access hatches are delivered with a complete installation manual, so you always have the installation instructions to hand.

Time savings

Whether you are a planning engineer, cost estimator, work foreman, project leader or a purchaser, working with Staka will help you work more efficiently. By using the roof access hatch configurator on our website, you will see a complete quote on your screen within one minute. The relevant documentation, drawings, CAD drawings and installation instructions are provided immediately. Practicality and efficiency in a nutshell.

Staka's roots go back to 1958. We have manufactured aluminium and stainless steel products for industry and the construction sector since 1982. In 2008 we launched our first line of roof access hatches specifically for offices, warehouses and factories. Quickly establishing ourselves on the market with high quality products and an exceptional level of service.t.

Dimensions

Staka roof access hatches can be supplied from stock in several standard sizes:

Model	Clearance*
TOP97	900x700 mm
TOP99	900x900 mm
TOP147	1400x700 mm
TOP159	1500x900 mm
TOP249	2400x900 mm

* The longest side is the hinged side.

Accessoires

The roof access hatches can be supplied in combination with ladders, staircases and other accessories.

Extension ladders: Available in two or three-part construction, compliant with NEN 2484. The ladders can be fitted with accessories to hook them over the edge or hang them up and to provide additional safety and security.

Retractable ladder: Fitted with a telescopic railing, compliant with EN 14975 and suitable for ceiling heights of up to 3250 mm.

Fixed ladders/caged ladders: Supplied with wall brackets for wall mounting, compliant with EN 14122-4 standard and also available with cage safety feature.

Fixed staircase: A fixed aluminium staircase is an appropriate solution for regular roof access via a large roof access hatch and comes complete with handrails.

Safety railing: Safety railings are installed alongside or around the roof access hatch and provide extra support and safety when entering and exiting the roof access hatch.

Your online quotation within one minute!

Pick, click and you're done! Whether you're an architect, contractor, roofer or a builder's merchant employee, use the pricing configurator on our website to calculate your net price. It's as simple as that.
